Biology and Fertility of Soils

Founded in 1985
by J. C. G. Ottow

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-0727, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 27 · 1998

Abdel-Wahab SM → Hashem FM
Acea MJ → Prieto-Fernández A
Akao S → Tchebotar VK
Alfani A → Rutigliano FA
Ali R → Mahmood T
Amora-Lazcano E, Vázquez MM, Azcón R: Response of nitrogen-transforming microorganisms to arbuscular mycorrhizal fungi 65
Andrén O → Kätterer T
Arunachalam A → Maithani K
Asis Jr. CA → Tchebotar VK
Assefa F, Kleiner D: Nodulation pattern and acetylene reduction (nitrogen fixation) activity of some highland and lowland *Acacia* species of Ethopia 60
Ayarza M → Westerhof R
Azcón R → Amora-Lazcano E

Badejo MA, Nathaniel TI, Tian G: Abundance of springtails (Collembola) under four agroforesty tree species with contrasting litter quality 15
Baker JC → Willison TW
Barraclough D → Jamieson N
Batjes NH: Mitigation at atmospheric CO_2 concentrations by increased carbon sequestration in the soil 230
Becker M, Johnson DE: Legumes as dry season fallow in upland rice-based systems of West Africa 358
Beese F → Kamp T
Bellini L → Rutigliano FA
Berg M → Coûteaux MM
Binet F, Fayolle L, Pussard M: Significance of earthworms in stimulating soil microbial activity 79
Blagodatsky SA → Larionova AA
Blanchart E → Loranger G
Boddey LH → Hungria M
Boeckx P, Van Cleemput O, Meyer T: The influence of land use and pesticides on methane oxidation in some Belgian soils 293
Börjesson G, Nohrstedt H-Ö: Short- and long-term effects of nitrogen fertilization on methane oxidation in three Swedish forest soils 113
Bonhomme E → Dendooven L
Bork H → Topp E
Bouwman H: Evaluation of a technique to obtain development-stage-synchronised earthworms (*Eisenia fetida*) 368
Britton J → Moënne-Loccoz Y
Burket JZ, Dick RP: Microbial and soil parameters in relation to N mineralization in soils of diverse genesis under differing management systems 430
Buyanovsky GA, Wagner GH: Changing role of cultivated land in the global carbon cycle 242

Capowiez Y, Pierret A, Daniel O, Monestiez P, Kretzschmar A: 3D skeleton reconstructions of natural earthworm burrow systems using CAT scan images of soil cores 51
Carballas T → Prieto-Fernández A
Castaldi S, Smith KA: Effect of cycloheximide on N_2O and NO_3^- production in a forest and an agricultural soil 27
Chander K, Goyal S, Nandal DP, Kapoor KK: Soil organic matter, microbial biomass and enzyme activities in a tropical agroforestry system 168
Chhonkar PK → Purakayastha TJ
Ciurli S → Marzadori C
Cluzeau D → Pérès G
Coelho RRR → Linhares AA
Coleman K → Falloon PD
Coûteaux MM, Raubuch M, Berg M: Response of protozoan and microbial communities in various coniferous forest soils after transfer to forests with different levels of atmospheric pollution 179
Crawford JJ, Traina SJ, Tuovinen OH: Biodegradation of benzoate with nitrate as electron acceptor at different redox potentials in sand column microcosms 71
Curmi P → Pérès G

Daniel O → Capowiez Y
Dendooven L, Bonhomme E, Merckx R, Vlassak K: Injection of pig slurry and its effects on dynamics of nitrogen and carbon in a loamy soil under laboratory conditions 5
Dendooven L → Luna-Suárez S
Devis X → Hénault C
Dick RP → Burket JZ
Dilly O, Munch J-C: Ratios between estimates of microbial biomass content and microbial activity in soils 374
Dominguez J → Edwards CA
Duchesne LC → Staddon WJ
Dzowela BH → Mafongoya PL
Edwards CA, Dominguez J, Neuhauser EF: Growth and reproduction of *Perionyx excavatus* (Perr.) (Megascolecidae) as factors in organic waste management 155

Edwards CA → Whalen JK
Ertebo T → Samater AH

Fagbola O, Osonubi O, Mulongoy K: Growth of cassava cultivar TMS 30572 as affected by alley-cropping and mycorrhizal inoculation 9
